Current issues and evolutions in our nursing education

- Teachers ↑ (n= 21)
- Lack of nursing students (80 vs. 68 incl. waiting list)
- Coordination of two relocated universities – constructive content
- Lectures with big groups (n > 60)

Current research projects at my university

Development and validation of the Epilepsy Monitoring Unit Comfort questionnaire (EMUCQ) – a mixed-methods study (Egger-Rainer)

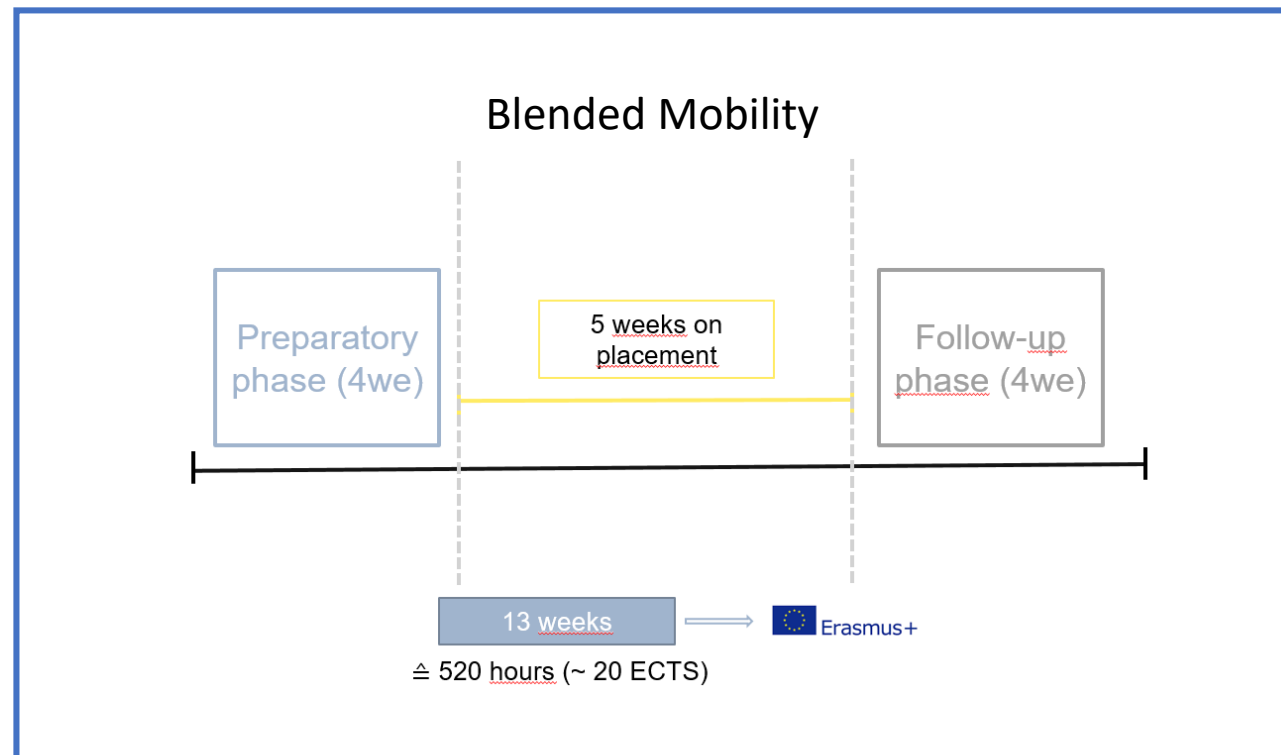

Development of a fall risk assessment for community dwelling geriatric people based on the item response theory (Meinhart)

REdesigning HeAlth ProduCTs – interdisciplinary study (nursing and design and product management) (Roth)

Possibilities & wishes for cooperation in new research & educational projects

Possibilities for incoming students

From our site **everytime** – hospitals ?!?
